Section 8. Exposure controls/personal protection

### Appropriate engineering controls
- Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. Provide suitable facilities for quick drenching or flushing of the eyes and body in case of contact or splash hazard.

### Personal protection

#### Eye protection
- Use chemical splash goggles. For continued or severe exposure wear a face shield over the goggles.

#### Hand protection
- Use chemical-resistant, impervious gloves.

#### Skin protection
- Use suitable protective equipment.

#### Respiratory protection
- A respirator is not needed under normal and intended conditions of product use.

#### Hygiene measures
- Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing.
